**Excavation Specification Information**

The following specifications are required for excavation within the Town roads, and the unimproved sections of the Town right-of-way:

1. The excavation within the bituminous concrete pavement shall follow the following specifications:
  - a. The existing pavement shall be saw cut.
  - b. D.O.T. approved processed stone in accordance with Form 816, 2004 will be installed to 15 inches within the top of the existing pavement. Suitable excavated material will be allowed as backfill material upon approval of the Director of Public Works.
  - c. The processed stone shall be compacted every 6 inches.
  - d. D.O.T. approved 3/4" or 1-1/4" processed stone in accordance with Form 816, 2004, shall be installed for 12 inches in two 6 inch layers (compacted), within 3" of the top of the existing pavement.
  - e. The existing saw cut edge of the pavement will be tack coated.
  - f. Three (3) inches of bituminous concrete (D.O.T. Class 2) shall be installed as a temporary pavement and compacted. The compaction method will be approved by the Director of Public Works.
  - g. The pavement shall be saw cut approximately one foot wider than the temporary pavement saw cut edge and tack coated.
  - h. After approximately one year, the temporary bituminous concrete plus one inch of processed stone shall be removed and replaced with a permanent bituminous concrete pavement (4 inches). The permanent pavement shall be a 2-inch thickness of DOT Class I, bituminous concrete for the base course, and a 2-inch thickness of D.O.T. Class 2 bituminous concrete wearing surface. The compaction method will be approved by the Director of Public Works.

2. The work and excavation within the unimproved sections of the Town of Brookfield right-of-way (shoulder), shall follow the following specifications:
  - a. D.O.T. approved processed stone in accordance with Form 816, 2004 will be installed within four inches of the top of the existing ground elevation. Suitable excavated material will be allowed as backfill material upon approval of the Director of Public Works.
  - b. The D.O.T. approved processed stone shall be compacted every six inches.
  - c. Four inches of D.O.T. approved topsoil will be installed to the existing ground elevation.
  - d. The topsoil will be raked and hydroseeded with D.O.T. approved seed, satisfactory to the Director of Public Works.
  
3. The following is a list of additional requirements for the proposed work:
  - a. The hours and days of work per week should be approved by the Director of Public Works, Town of Brookfield.
  - b. Policemen should be used as trafficmen.
  - c. The radio and newspaper will be informed with regard to construction.
  - d. The pre-construction meeting should be held with the Director of Public Works and Chief of Police, Town of Brookfield.

Please phone the Public Works office at (203 ) 775-7318 if you have any questions with regard to the specifications.
